

Memo Cart

Flexibility

- Quickly place & retrieve equipment when and where it is needed
- Work surface & drawers module can be raised and lowered
- Drawers are easily removed for cleaning & restocking
- Melds with Herman Miller's CoStruc™ product line

Quality

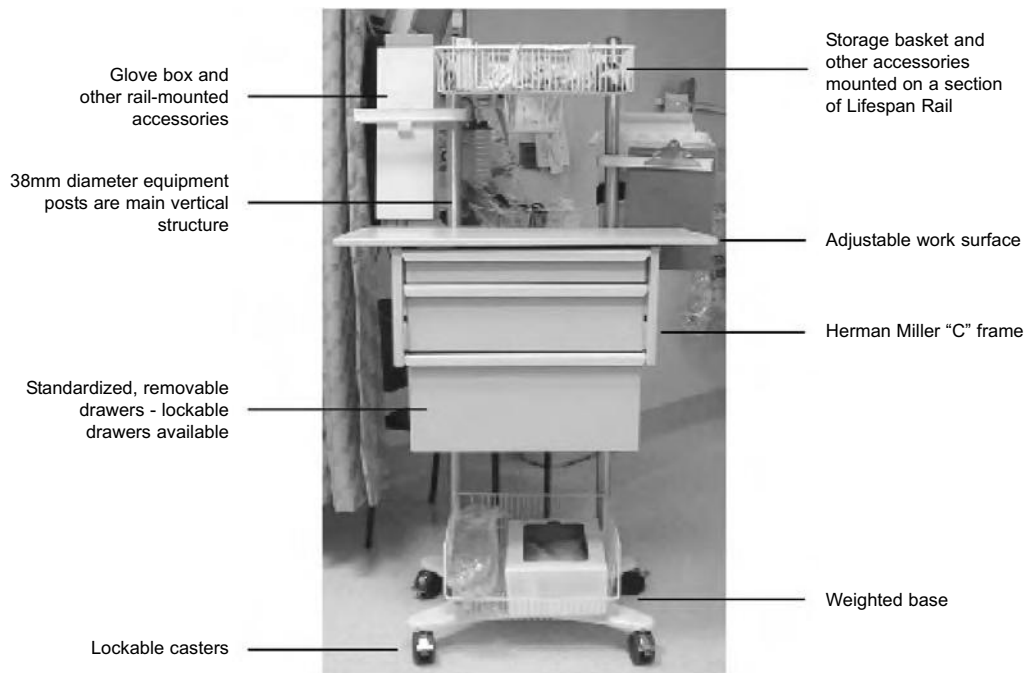

- The MEMO cart is made from high quality materials (extruded, anodized or powder-coated aluminum, machined and powder-coated steel, and aluminum, stainless steel, and high-grade molded plastics) and is easy to keep clean.

Adaptability

- Compatible components with original Fairfield Medical Rail Systems product
- Easily reconfigured by staff to meet evolving needs
- Equipment & accessories can be shared

Surge Patient Overflow

- Memo Cart provides a complete mobile patient care station to meet overflow and surge population requirement.

The Lifespan Mobile Equipment Module (MEMO) cart is a mobile equipment management system for use in patient care areas. Generous, easy-to-clean drawers and a rimmed work surface help organize and stage anything from therapeutic devices and disposables to patient meals. The work surface and drawer module is part of the reputed Herman Miller CoStruc™ materials handling system and will integrate seamlessly with compatible structures used throughout many care facilities.
