

Stethoscopes

MABIS® *Signature*™

The patented SmartTone™ technology allows you to monitor high and low frequencies by varying the pressure applied to the chestpiece. SmartTone technology allows a full range of sounds to be heard through just one chestpiece.

BELL MODE

To listen to low frequency sounds (bell mode), make light contact w/the chestpiece

DIAPHRAGM MODE

To listen to higher frequency sounds (diaphragm mode), make firm contact w/the chestpiece

#HH-10-410-020

Signature™ Series Low Profile Stethoscope - Cardiology

- Designed specifically for cardiology examinations
- Outstanding acoustical clarity
- Features stainless steel dual inner-spring binaural, SmartTone technology, deluxe 22" twin-tubing and a stainless steel chestpiece
- Includes two extra sets of flexible eartips in two sizes and one extra diaphragm
- Packaged in an attractive four-color, foam-lined box
- Lifetime limited warranty
- Latex-free

MABIS® Signature™ Electronic Stethoscope

- Offers state-of-the-art technology with volume amplification and sound filtering systems
- Captures sounds typically difficult to identify in standard stethoscopes
- Equipped with a built-in computer chip which eliminates aphonic and resonance effects for enhanced audibility
- Audio frequency can be divided into three selective modes: Standard Bell, Diaphragm and Extended Diaphragm
- Electronic amplifying system offers eight different volume levels
- Automatically starts with the last used sound collection and volume mode
- Features auto shut-off after 2 minutes to save battery life
- Ensures ear comfort with an innovative adjustable binaural degree control
- Includes three 357 type mercury batteries
- Three-year limited warranty
- Latex-free

3M™ Littmann® Stethoscopes

For over 40 years, 3M™ Littmann® stethoscopes have been recognized worldwide as the trusted leader in auscultation technology. Professionals rely on Littmann stethoscopes for their superior acoustics, reliable performance and unsurpassed quality and service.

The acoustical clarity that a Littmann stethoscope delivers ensures efficient and accurate patient assessment each and every time. Tunable technology, available on most units, provides convenience and versatility.

Littmann offers excellent product warranties, 24-hour service center turnaround and lifetime refurbishment programs that are unmatched in the industry.

3M Littmann continues to innovate the market by providing a wide range of styles to meet the needs of today's healthcare professional. From the 3M Littmann Electronic stethoscopes, which take auscultation technology to a new level, to the finely crafted Littmann Lightweight II S.E., the superior quality and outstanding Littmann reputation continues on.

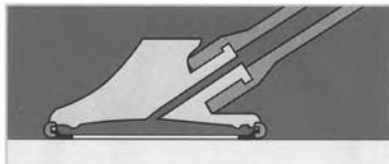

MABIS® Healthcare is proud to offer a valuable combination kit featuring either the Littmann Lightweight II S.E. or Classic II S.E. stethoscope paired with our popular Match Mates® Aneroid Sphygmomanometers.

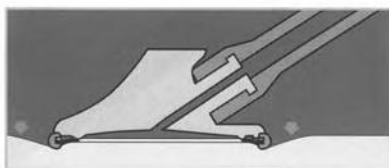

Stethoscopes

3M™ Littmann's Tunable Technology

Littmann's patented tunable technology provides convenience, versatility and enhanced acoustics in either a single-sided design or a traditional chestpiece design. The level of pressure placed on the chestpiece controls the bell and diaphragm modes. Its dual-frequency diaphragm combines both bell (low-frequency) and diaphragm (high-frequency) modes.

BELL MODE (low-frequency) Use light pressure to the chestpiece to hear low-frequency sounds.

DIAPHRAGM MODE (high-frequency) Without turning over the chestpiece, use firm pressure to hear high-frequency sounds.

SINGLE-SIDED CHESTPIECE

Available on Models:

Master Cardiology™

Master Classic II

Select

Cardiology STC

TRADITIONAL CHESTPIECE

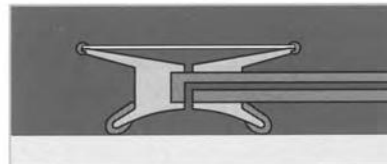

Available on Models:

Cardiology III

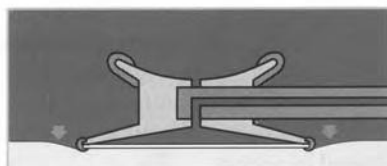

Classic II S.E.

3M™ Littmann's Traditional-Combination-Style Chestpiece

Littmann's traditional chestpieces have a bell side to hear low-frequencies and a diaphragm side to hear high-frequency sounds. The chestpiece needs to be turned over to hear the different sounds.

BELL MODE (low-frequency) Use light contact on the chestpiece of the bell side to hear low-frequency sounds.

DIAPHRAGM MODE (high-frequency) Turn the chestpiece over, index to the opposite side and uses firm pressure to hear high-frequency sounds.

TRADITIONAL COMBINATION-STYLE

Available on Models:

Classic II Pediatric

Classic II Infant

Lightweight II S.E.

3M™ Littmann® 4100WS Electronic Stethoscope

- Features amplification and ambient noise reduction (ANR) technology that acoustically cancels an average of 75% of distracting room noise
- Up to 18X the amplification of non-electronic Littmann® stethoscopes
- Offers recording, storage and playback capabilities at normal and half-speed
- Advanced Sound Analysis Software provides a visual to what is being heard via phonocardiogram on IBM compatible PCs or Pocket PC
- Transmit digital recordings via infrared to other Littmann 4100, 4000, PC compatible or hand-held device
- Three frequency response modes to choose from for optimal heart and lung auscultation: Bell, Diaphragm, and Extended Range
- Includes a built-in LCD display on the chestpiece for easy viewing of the heart rate
- Able to digitally record and store sound on six distinct tracks
- Includes anatomically correct headset and two AAA alkaline batteries for 20 hours of continuous use
- Chestpiece is sized for adult or pediatric patients and features a nonchill rim
- 3M™ Littmann® Snap Tight Soft-Sealing eartips provide an excellent acoustic seal and comfortable fit
- Ideal for use in teaching and telemedicine
- One-year warranty
- Latex-free

3M™ Littmann® Classic II S.E., Classic II Pediatric and Infant

- Features a tunable diaphragm (Classic II S.E.) that allows both low and high frequency sound to be heard by simply alternating the pressure on the chestpiece
- The Classic II Pediatric and Infant stethoscopes feature the floating diaphragm technology
- Classic II Pediatric and Infant style stethoscopes are optimally sized to facilitate sound sources in smaller patients
- All models feature single-lumen tubing, nonchill rim and patented Littmann soft-sealing eartips
- Three-year warranty
- Teaching stethoscope model (2138) includes two headsets
- Latex-free

Stethoscopes/Accessories

The Baum Sprague Rappaport Type Stethoscope

- Designed to meet a wide variety of auscultatory demands
- Built to our unique specifications

Features:

- Chrome-plated zinc chestpiece and rotatable chrome-plated brass binaural
- Modular adult and pediatric diaphragms, large, medium and small bell receivers provide an extended range of auscultatory frequencies in one versatile stethoscope
- Thick walled non-latex tubing leads directly from the chestpiece to each ear to provide improved acoustic separation
- Includes three types of eartips
- Tubing colors are black, gray and blue and include a name tag/diaphragm replacement tool

Item No.	Length	Color
#29-0661-2700	30 inches	Black
#29-0661-2701	30 inches	Gray
#29-0661-2702	30 inches	Blue

The Baum Stainless Steel Cardiology Stethoscope

- Designed for cardiology
- Built to our unique specifications
- Delivers superior acoustic sensitivity

Features:

- Precision machined stainless steel dual head chestpiece, valve stem and binaural
- A dual binaural spring is incorporated inside the tubing to reduce bulk and weight
- Non-chill rings are fitted to the diaphragm and deep cone shaped bell receivers for patient comfort
- Soft eartips ensure a comfortable, correct fit
- Two separate channels in one piece of non-latex tubing (black or gray)
- Extra eartips and a replacement diaphragm are included

Item No.	Length	Color
#29-0661-2730	27 inches	Black
#29-0661-2731	27 inches	Gray

The Baum Stainless Steel Dual Head Stethoscope

- Designed for general healthcare applications
- Built to our unique specifications
- Offers outstanding acoustics

Features:

- Precision machined stainless steel dual head chestpiece, valve stem and binaural
- A dual binaural spring is incorporated inside the tubing to reduce bulk and weight
- Non-chill rings are fitted to the diaphragm and the bell receivers for added patient comfort
- Soft eartips ensure a comfortable, correct fit
- Single lumen non-latex tubing (black or gray)
- Extra eartips and a replacement diaphragm are included

Item No.	Length	Color
#29-0661-2720	31 inches	Black
#29-0661-2721	31 inches	Gray

Stethoscopes/Accessories

ORIGINAL HARVEY STETHOSCOPES

HARVEY DOUBLE HEAD

ITEM NUMBER #20-507928

Combines brass bell and flat diaphragm chest pieces to detect a wide frequency range of sounds. Diaphragm transmits higher frequency heart and lung sounds.

HARVEY TRIPLE HEAD

ITEM NUMBER #20-507927

Features three easily rotated chest pieces (bell, corrugated diaphragm, flat diaphragm). The sound detection capability of three chest pieces allows for the most auscultatory examination.

Accessory Kit for Double and Triple Head Harvey Stethoscopes

- Pediatric Chest Piece
- Two Corrugated Diaphragms
- Flat Diaphragm
- One Pair Soft Rubber Ear Tips
- One Pair Small Delrin Ear Tips

Stethoscopes/Accessories

BRACELET TYPE

#19-00535

Chest piece, bracelet type, lightweight plastic with diaphragm, adjustable arm band and Luer lock connector. Use with Model No. 19-00522L stethoscope.

#19-00535

MARTIN

#19-00441

Martin type of lightweight aluminum accommodates standard plastic I.V. tubing. The angle of the inlet keeps the chest piece flat. One size for both premature and infant.

#19-00441

Wenger* Chest Pieces

#10-73015 Child (1 1/8")

#10-73016 Adult (1 1/2")

These are solid chest pieces made from chrome-plated brass. They have relatively deep sound chambers and are supplied with Luer connectors for attachment to ear pieces. They may be placed on the sternal notch where they may or may not be taped. (*Available Gold Plated by special order)

#10-73015

Infant* Chest Pieces

#10-73003 7/8" Diameter, Newborn

#10-73004 1 1/8" Diameter, Infant

Manufactured from lightweight, chrome-plated aluminum, Infant Chest Pieces feature a hollow design and rounded, smooth chest surfaces, making them ideal for use with newborns and infants. (*Available Gold Plated by special order)

DISPOSABLE STERILE LEFFINGWELL ESOPHAGEAL STETHOSCOPE

#1A-ES12000	12FR. Infant
#1A-ES18000	18FR. Child
#1A-ES24000	24FR. Adult

This sensitive Leffingwell Esophageal Stethoscope is a highly sensitive and accurate sound transmitter. It is designed so that the tympanum lies exactly in the area where the chest and heart sounds are most precisely defined. Manufactured from Polyvinyl chloride and is sterile-packaged for single use. Packaged in 50/box.

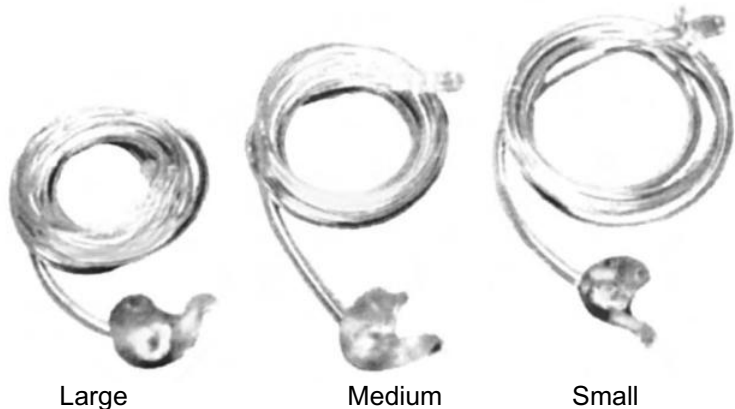

MONASCOPE

Left Ear
 #19-00383 Small
 #19-00384 Medium
 #19-00385 Large

Right Ear
 #19-00380 Small
 #19-00381 Medium
 #19-00382 Large

The Monascope, complete with sound tubing and female luer connector is an inexpensive, comfortable, single C-shaped ear piece for constant monitoring of the patient. It is molded of sufficient durometer to accurately reflect sound, yet soft enough to assure comfort. Medium size fits most users.
