www.mercurymed.com
Since 1963

Clinicians can now deliver aerosol & CPAP therapy with just one oxygen source and the added safety of an apnea alarm accessory.

FLOWSAFE[®] II

with Apnea Alarm Accessory

FLOWSAFE[®] II EZ

with Apnea Alarm Accessory

(OSA) Obstructive Sleep Apnea is a disorder in which oropharyngeal soft tissue intermittently obstruct the airway during sleep.¹⁻⁴ If undetected, OSA can lead to serious health problems and is associated with important peri-operative complications.⁵⁻¹¹

Increasing prevalence for sleep apnea requires the integration of a sleep apnea management (SAM) program to reduce the risk of experiencing an adverse event after receiving sedation.¹

Implementing a sleep apnea monitoring program for patients undergoing sedation for medical or surgical procedures will reduce patient health risks, reduce professional medical liabilities and create new revenue streams for disease management services.¹
